EDUCATION

National University of Singapore

Bachelor of Computing in Computer Science (with Honors*)

2nd Class (Upper) Honors

Aug 2022 – Dec 2025

(Expected)

Nanyang Junior College (A Levels)

H3 Math, with distinctions in H2 Chemistry, Physics and Mathematics

Rank Point: 88.75/90

Feb 2018 – Nov 2019

PROJECT EXPERIENCE

Alibaba International Global E-Commerce Challenge Finalist 2024

- Represented National University of Singapore in competing among Top 10 teams in Hangzhou, China
- Solved real-world problems in E-Commerce platforms such as Lazada and AliExpress
- Developed and presented an innovative AI-driven solution that addressed challenges in customer engagement as well as visual and voice search
- Utilized advanced machine learning techniques such as NLP, Computer Vision, and data-driven insights to propose scalable solutions
- Demonstrated strong collaboration and communication skills in an international environment

NUS Orbital - Apollo (Summer 2023)

- Built web application food recommender system using ReactJS, Flask, Django
- Ingested data and performed ETL process the food recommender system
- Prototyped using Figma and deployed web application
- Built a recommendation model using Pytorch library and Cosine Similarity algorithm
- Created visualization using Seaborn and Matplotlib

WORK EXPERIENCE

Data Science Intern, Actxa

May 2024 - Dec 2024

- Assisted data scientists in conducting public healthcare research and development within the digital health and wellness domain
- Piloted a research and development on Deep Learning models to improve the current metrics provided by traditional Machine Learning methods
- Conducted on-site and off-site data collection, organized data, and managed data storage
- Developed data-driven solutions using statistical modeling, and machine learning techniques
- Tested and validated algorithms to ensure accuracy and reliability
- Documented research activities, experiments, and modeling findings

AWARDS & CERTIFICATES

- Honor Roll for JC2 Preliminary, Nanyang Junior College
- Honor Roll for JC2 Block Test, Nanyang Junior College

Oct 2019

Feb 2019

SKILLS/COMPETENCIES AND INTERESTS

- Proficient in Microsoft PowerPoint, Words and Excel
- Proficient in Java, Python, C Programming Language
- Proficient in Data Science tools such as Pandas, NumPy, Matplotlib, Seaborn and Scikit-learn
- Proficient in Collaborative tools such as GitHub, Bitbucket, Confluence, and Jira
- Experienced with Deep Learning for Computer Vision (CV) and Natural Language Processing such as RNN, CNN, BERT
- Fluent in English and Chinese
